NAPA VALLEY WATERSHED MANAGEMENT (GI) NAPA COUNTY, CALIFORNIA

CONGRESSIONAL DISTRICT: 1st District, Rep. Mike Thompson

PROJECT DESCRIPTION: The study area comprises 426 square miles, and lies just north of San Pablo Bay, approximately 40 miles northeast of San Francisco, California. The study will identify solutions to watershed management issues involving the Napa River and its tributaries upstream of the City of Napa.

FISCAL YEAR 03 BUDGET: \$150,000

POSSIBLE SOLUTIONS: To be determined.

PRESENT STATUS: A Reconnaissance Study, certified in April 2000, recommended Federal participation in continuing with this study, and the Feasibility phase was initiated with the execution of the Federal Cost Sharing Agreement (FCSA) between the Corps of Engineers and the Napa County Flood Control and Water Conservation District in April 2001. A Watershed Information Center (WIC) is being developed as a resource to serve all interests in the Napa Valley by providing and maintaining a watershed database for public education, communication and feedback.

FUTURE EFFORTS: With FY03 funds, work will continue to identify the resources within the watershed, focusing on; habitat restoration opportunities, flood protection measures, improving water supply and water quality, and improving the general health of the watershed.
